It is important to consider material and usage when selecting a metal cutting blade. Because of the wide variety of applications, the final determination of proper blade selection rests with the user. The operator should use care and consistency to achieve long blade life.

Expected Blade Life * (on mild steel)

Material	Size	Approximate Life
Angle steel	2in.x2in.x1/4in.	300 cuts
Square tube	2in.x2in.x3/16in.	300 cuts
Round pipe	2in.x1/4in.	150 cuts
Plate steel	1/4in.x4in.	250 cuts

**Level of operator experience can alter or determine blade*
